PROFESSIONAL SUMMARY

Data Science and Engineering student at Universidade da Coruña with a strong foundation in statistical modeling, machine learning, and data pipeline engineering. Experienced in building analytical solutions across the full data lifecycle, from ingestion and transformation to visualization and decision support, with hands-on industry experience at ENXENIO S.L. as a Data Engineer. Awarded **2nd place** at the *Datathon 2026*, organized by the Instituto Tecnológico de Galicia and Universidade da Coruña. Passionate about delivering end-to-end data solutions that generate tangible business value in fast-paced, innovation-oriented environments.

PROFESSIONAL EXPERIENCE

Data Engineer Intern
ENXENIO S.L. · A Coruña, Spain

September – October 2025

- Validated and audited key business metrics using DAX expressions and PostgreSQL queries, ensuring data integrity across reporting layers.
- Documented and maintained data models within Power BI environments, improving team knowledge transfer and onboarding efficiency.
- Optimized dashboards through advanced visualizations and Row-Level Security (RLS) configurations tailored to stakeholder needs.
- Conducted systematic SQL-based data audits to detect and resolve inconsistencies in production datasets.
- Designed and implemented dynamic report navigation using Power BI bookmarks, enhancing end-user experience.

EDUCATION

Bachelor of Science in Data Science and Engineering
Universidade da Coruña, A Coruña, Spain

2022 – Present

Technological Baccalaureate (STEM Track)
IES Alonso Berruguete, Palencia, Spain

2015 – 2021

CERTIFICATIONS & AWARDS

- Deep Learning with PyTorch for Medical Image Analysis** — Udemy
- 2nd Place, Datathon 2026** — Instituto Tecnológico de Galicia & Universidade da Coruña

FEATURED PROJECT

Maritime Intelligence Platform (2nd Place)
Datathon 2026 — ITG & Universidade da Coruña | 📁 [Repository](#)

January 2026

- Designed and implemented a six-stage end-to-end pipeline processing 171,750 synthetic maritime incidents across 5,725 vessels with

170+ engineered features.

- Built six specialized ML models: anomaly detection (XGBoost, 97.6 %), risk classification (Random Forest, 92.6 %), incident type classification (XGBoost, 99.9 %), cost regression (Gradient Boosting, $R^2 = 0.70$), temporal forecasting (Prophet), and geographic clustering (HDBSCAN).
- Developed a full-stack web dashboard with Next.js 14, TypeScript, Tailwind CSS, Recharts, and Leaflet — featuring executive KPIs, action center, incident explorer, interactive heatmaps, and vessel tracking.

TECHNICAL SKILLS

Programming & Query Languages | Python R SQL (PostgreSQL) DAX PySpark TypeScript

Machine Learning & AI | Scikit-learn XGBoost PyTorch Prophet HDBSCAN Deep Learning Predictive Modeling Statistical Analysis

Data Engineering | ETL Pipelines Big Data Distributed & Parallel Processing PostgreSQL Data Auditing

Web & Visualization | Next.js React Tailwind CSS Recharts Leaflet Power BI (RLS, Bookmarks, Data Modeling)

Tools & Platforms | Git LaTeX R Studio Docker

OTHER ACADEMIC & PERSONAL PROJECTS

- **SmartPorts Visual Classification** — Binary image classification for maritime port surveillance: ship detection from aerial imagery and docked-vessel identification via fine-tuning. Compared training from scratch vs. ImageNet transfer learning, studying the impact of validation split ratio and data augmentation on accuracy, F1, and AUC-ROC across multiple seeded runs.
- **Road Segmentation from Aerial Images** — Semantic segmentation pipeline using convolutional deep learning models on high-resolution satellite imagery.
- **Object Recognition from Images** — End-to-end CNN-based image classification system trained and evaluated on benchmark visual datasets.
- **Clinical Information Retrieval System** — NLP-based engine for intelligent retrieval from structured and unstructured medical records.
- **IoT Malware Detection with PySpark** — Distributed anomaly-detection pipeline for IoT network traffic, built on Apache Spark.

LANGUAGES

Spanish — Native proficiency **English** — C1 Advanced (Cambridge Certificate)

CORE COMPETENCIES

- Analytical & Critical Thinking
 - Cross-functional Team Collaboration
 - Proactivity & Independent Initiative
- Rigorous Attention to Detail
 - Rapid Adaptability to New Technologies
 - Clear & Structured Communication
